| 12 | Cardiovascular system |
| 13 | Prescribing suppositories in different forms |
| 14 | Revision for the end-term test |
| 15 | Evaluation and closing of the semester |

Course description:

The second semester of Pharmaceutical Latin continues to teach and practise prescription writing necessary for the Pharmaceutical Technology course. It introduces students to the basic terminology of some body systems like the digestive and respiratory system, as well as the skin and the

cardiovascular system. Greek terminology is presented through the names of the most common disorders related to the above systems, which is essential in students' understanding of indications and contraindications as well as side effects. Action and use words also come up in connection with indications as well as the names of the Hungarian FoNo preparation names. Besides, the course continues to present the grammar aspects necessary for prescription reading and writing, thus it highlights the declensions not covered in the first semester, the Latin conjugation system with its non-finite forms and the use of most common prefixes in everyday Pharmacy expressions and preparation names. The main goal of the course is to make students able to write any prescription found Formulae Normales without any difficulty.

Course requirements:

As the course is a practical, up to 2 classes may be missed. One single occasion can be made up with another group provided the student asks and receives the consent of the other group's teacher in e-mail. Failure to do so leads to signature refused.

The course book is necessary for active class participation, therefore the lack of course book in the class means a minus (similarly, chatting or inactive participation also lead to a minus). Students with 5 or more minuses cannot get a signature.

Students must sit for a mid-term test and an end-term test, the date and time of which is to be announced by the teacher. Besides, students will be tested on the minimum vocabulary uploaded on the website of the Language Department. Students must pass at least 8 out of the 10 quizzes, otherwise they also have to take a test on the vocabulary of the course (along with the mid-term and end-term test). Students who pass all the 10 quizzes get 5+5 extra points to be added to the result of the tests. The final mark is given on the basis of the average of the two tests as follows. For further detailed information on course requirements, please contact your teacher.

| Grade | Percentage |
|------------------|------------|
| 1 (fail) | 1-59% |
| 2 (pass) | 60-69% |
| 3 (satisfactory) | 70-79% |
| 4 (good) | 80-89% |
| 5 (excellent) | 90-100 |
